Green Klean Air Scrubber

Being a parent as well as a person in sales, I am constantly looking for new and innovative products and ideas to benefit both my customers and my family. I often take products home and try them, before introducing them to my customers. This gives me more knowledge from experience, to offer my customers and to make recommendations for particular applications.

I purchased a **Green Klean Air Scrubber** to have as a demonstration model. Because my one year old son seemed to be suffering from allergies, waking every day with a runny nose, I took it home to try out in my son's room. I placed the **Air Scrubber** in his room (144 ft²) and ran it on the medium speed, while he slept. The **Air Scrubber** not only filtered the air, it also relieved the need for the ambient noise machine that we would play to help him to sleep. During the day, I turned the **Air Scrubber** on high and opened all of the doors to every room in the house (2400 ft²). After a week of using the **Air Scrubber** in this manner, I noticed a few pleasant changes in our home:

- 1) My son was no longer waking up with a runny nose.
- 2) I was breathing better in the house, myself. (I suffer with asthma and numerous allergies.)
- 3) The various odors that are often present in a home with a 1 year old and a 3 year old, were not as prevalent. (ie. Dirty diapers, baby food, formula, etc.)

I would highly recommend the **Green Klean Air Scrubber** to any parent. The **Air Scrubber** makes your home a cleaner, healthier environment for a healthy, happy child and family.

In the time since testing this device at home, I have seen the **Air Scrubber** used successfully in hospitality settings and in hotel rooms, as well as in doctors' offices, daycare centers and nursing facilities. It is a superb machine for many applications and appropriate in any indoor setting.
